

Christine - Nutrition Check-in & Meal Plan Exploration - July 11

[VIEW RECORDING - 40 mins \(No highlights\)](#)

[@0:05](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Can you hear me? Yeah. Can you hear me now? I was waiting for your, what do you call that, I was waiting for your audio to connect.

[@0:16](#) - **Chris**

Oh, yeah, all good now. Thank you.

[@0:19](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Tayo?

[@0:20](#) - **Chris**

Good, I'm bit tired and yeah.

[@0:25](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Tired because?

[@0:26](#) - **Chris**

Oh, I think because this one, I need to backup my colleague, she going to deliver, so yeah, a lot of handover, and then catching up.

Yeah.

[@0:36](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Okay, understand. Which is why you wanted the eat out and cook at home sort of ideas to work with, can I put it that way?

[@0:49](#) - **Chris**

So that you can streamline your entire nutrition.

[@0:52](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Okay.

[@0:52](#) - **Chris**

Prepare my meal first, because I mean the exercise routine and the working routine plus matters the same. Right. You understand.

And make it better, I mean, over the weekend I can home prep first, like, try to in place, like, what I'm going to eat for the next five days, or, yeah, that it will be.

[@1:13](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Okay. So we're going to do this on a, I guess, systematic level. We do the home food one first, then after that we do the eat好 one.

So how we are going to do the partnership, right, is, I will, I think at the back of your mind you probably already have, like, a few ideas already, so I'll get you to share with me.

Then what I will do is I'll tweak them, and after that we are going to look at whether or not that makes sense from a numbers perspective.

[@1:42](#) - **Chris**

Okay, Ken. Yeah, then, after that, then we look into the go out one. Yeah, sure. Most likely one hour should be more than enough.

Okay. Yeah.

[@1:54](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

How? Let's start with the eat out. Let's start with the go at home one first.

[@1:59](#) - **Chris**

You really had some use.

[@2:00](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

That you are quite used to by now, right?

[@2:02](#) - **Chris**

Mm-mm, yeah. Okay.

[@2:04](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Give me a few examples that you are quite excited about preparing at home.

[@2:09](#) - **Chris**

I think for preparing at home, my usual meal is like kind of straightforward. Either I use chicken breast or my salmon fish.

So either air fried or steamed. And then for the cup portion, it could be my pumpkin or my rice that I cook like one pot, and then I split up like for two to three days, and then share it with my husband as well.

And then for veggie, also kind of straightforward, either a water boil or like just a salad kind of veggie.

Like easy prep for me, and then usually when I buy rice, so my meal usually I can get for like two to three days.

So on midday, then I have to like a chase again and prepare.

[@2:49](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Do you currently enjoy the meal prep that you just told me?

[@2:55](#) - **Chris**

I think okay. Okay.

[@2:57](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, because it's not too, I mean, difficult it.

[@3:00](#) - **Chris**

For me lah, I easy to handle, and then, yeah.

[@3:03](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Taste-wise leh, okay ah?

[@3:05](#) - **Chris**

Hmm? Taste-wise okay?

[@3:07](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

I think okay.

[@3:08](#) - **Chris**

Okay. Because I still put my, I mean my seasoning that I have like soy sauce on.

[@3:12](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, I'm staring at your food lot while I'm talking to you. Because I recently had a case of, the person told me she also eat chicken breast and broccoli, but then she 100% blanched everything with no seasoning.

[@3:27](#) - **Chris**

Oh.

[@3:28](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, then I was trying to figure out like, will you love yourself if you continue eating like this for the next 6 months?

Then she was like, no I hate myself already. Yeah.

[@3:37](#) - **Chris**

You totally don't eat out or how? Because my time I take it out, I think it's still fine for me.

[@3:43](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

She eats out, but because there's no taste right? After a while, um, usually the first say, 3 months, 3, maximum usually about 3 months lah.

People will be quite okay eating like plain food. But. But. But. But. But. But. Unless your willpower is at some level of insanity, usually at some point you'll feel very, I don't want to eat this anymore.

Even if you're eating out.

[@4:11](#) - **Chris**

Yeah.

[@4:12](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So she hit that stage. I think she hit that stage around month, six.

[@4:18](#) - **Chris**

I think my son is still okay. It's just that my fridge is not big enough. Otherwise I will prepare like five days or six days.

That's probably why we are getting a big fridge for ourselves. Yeah.

[@4:34](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So this is probably one of the examples you're talking about. Let me share screen. Let me try and share screen.

SCREEN SHARING: Yi started screen sharing - [WATCH](#)

This is one of the examples you're talking about. Sorry.

[@4:48](#) - **Chris**

I think I can't see your screen yet. Oh, okay. Yeah. Good. Yes. Okay.

[@4:56](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So technically you can work with one like that. Chicken breast. I think the only thing for chicken breast is just make sure you have seasoning around it.

What I tend to do is I will play with different types of seasoning. So my girlfriend and I, we got quite a bit of a spicy tooth.

So both of us will have a tendency to use kichap manis per dust.

[@5:27](#) - **Chris**

So that's what we use as our base seasoning when we don't want to put anything else. I do have as well, I have my Chinese kind of like mala spices and then my husband Thai, those instant curry packs as well.

[@5:42](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, so that's where you want to explore a bit more. Then when you are, so sometimes I will get a bowl of chicken breast.

Like I will suddenly eat, then I'll be like, okay, I don't really want it really. So when that happens, it's okay to switch over to chicken thigh.

[@5:57](#) - **Chris**

Then if you switch over to chicken thigh and you are feeling

[@6:00](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

If bit calorie conscious, right, then you're very scared of rice, you can work with potato, sweet potato or boiled potato, it's fine.

[@6:09](#) - **Chris**

But I would have this question, right, because when I view the food log that Evelyn put in, so I always think that if let's say the day that when I hit close to my protein intake, like close to like 80 or 100, right, but at the same time my calorie, it would be like over than 1,600, we said it's 1,600, right?

[@6:30](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

I think so, yeah.

[@6:31](#) - **Chris**

So it will hit more like either I go to 1,007 or sometimes it might hit like 1,008 but 2,000, so how do I balance it if I say I still want my rice, because my rice right now I control right within 80g to 100g, is it like I have to go lesser or...?

[@6:45](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

I understand. Normally what I would do is I will hit the protein first, then I will purposely hit protein before I hit the rest of the macro so that I don't have to worry about that problem.

[@6:58](#) - **Chris**

is . . . Yeah, so normally, normally. So does that mean that if they say I want to take rice on my lunchtime, I mean, it might turn out to be higher calorie, but at night I should reduce or cut off my carbs.

[@7:18](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Thousand six. Yeah, usually thousand six if you have a breakfast, a lunch, and then dinner. Normally, lunch and dinner, one of them you end up having, one of them you end up having more rice, the other one you end up having lesser rice.

[@7:36](#) - **Chris**

Mhm. Yeah.

[@7:39](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Um, can you? Otherwise, you usually end up having less rice for both.

[@7:46](#) - **Chris**

I think my son, yeah, sometimes I will have like lunch, rice, and then night I will skip, but sometimes I will have like both meals have rice or noodles as well.

[@7:54](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Uh, the days when you have...

[@7:58](#) - **Chris**

One hundred. roasted, That's great. Absolutely. Yeah.

[@8:01](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

The days when you have both meals, rice or noodles, usually will you be exercising?

[@8:12](#) - **Chris**

It really depends on the day itself. I mean the exercise routine, it sticks to the same. Monday, Wednesday, Friday.

Okay.

[@8:24](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

You explore two products. If let's say it's a calorie, so I don't have a substitute for rice, but noodles I can support.

If let's say now the problem is you want noodles, but you don't want the calorie, then kong yet noodles is probably your best friend.

[@8:43](#) - **Chris**

Oh, the kong mehap.

[@8:45](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah. Nowadays fair price sell about \$2, so it's not this expensive.

[@8:51](#) - **Chris**

So how's the texture or the taste?

[@8:56](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Do you know Tang Hun? Do you know what's Tang Hun? Yeah. Around there, but a bit more chewy.

[@9:03](#) - **Chris**

But compared to Tang Hun, Tang Hun have higher calorie, the mung bean noodles, right?

[@9:08](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, Tang Hun. So, kong yak is zero calorie, like zero to ten calorie for the entire packet.

[@9:15](#) - **Chris**

Oh, I've never tried before, maybe it's a good try.

[@9:18](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, the good thing about a kong yak noodle is it can absorb flavour.

[@9:23](#) - **Chris**

Mmm. So, if you cook it inside soup, usually it's quite easy to absorb flavour. So, kong yak noodle, is it the one that add on the, what's that called, the Japanese hot pot or Korean hot pot inside heavy one?

Is it the same? Uh, sometimes Japanese hot pot will have this one. The on-day on-day? kong yak not.

[@9:43](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Oden, Oden half. Oden, oh, okay, okay. Yeah, Oden sometimes will have this one.

[@9:48](#) - **Chris**

Hmm, I've never tried before because it looks like very blank, yeah. Maybe I should.

[@9:53](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

It's very, uh, if you eat by itself, it's quite bland. But if you eat with your sauce, they can absorb the sauce.

[@9:59](#) - **Chris**

Okay. Okay. Yeah.

[@10:02](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then the other one, if you don't, if you want protein, and then you also want noodle, then this is one of the things that I usually eat.

It's called paye tofu. Oh, okay.

[@10:15](#) - **Chris**

The mala one, yeah.

[@10:17](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

The mala gankwa, have Yeah, yeah, yeah, yeah. Yeah, sure. The mala one, yes. What is that considered protein?

[@10:24](#) - **Chris**

Can I have protein in the noodle itself?

[@10:28](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

It's quite protein heavy.

[@10:31](#) - **Chris**

Oh, okay.

[@10:32](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

you see your Unica, right? This kind of one pack, one pack gun, right? Uh-huh. One serving, 165 calorie, 20 gram protein, which is very close to a protein shake.

[@10:46](#) - **Chris**

Okay. Yeah, the carbohydrate is like 2 gram only, the fat is like 8 gram. Mmmhmmmmhm. But you, so the entire, like you buy, like that, right?

[@10:55](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

It's usually at fair price is like 3 dollars.

[@10:58](#) - **Chris**

Yep. Then like for 3 dollars,

[@11:00](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Or else you buy like 60 grams of protein already, yeah, so it's quite not bad lah, then yeah, so you can consider this, then cause you got the mala spice that sometimes you use right, technically you can use this to cut into like yokan tofu noodle, then after that you use it to prepare like a dried mala kind of a thing, then you just need to add vegetable, then you're done already.

[@11:32](#) - **Chris**

Mm-mm. Yeah, so you can do like a if I think that if I say I'm having this one right, so do I, can I still add my, like chicken, fish, then right?

[@11:42](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, so you do like, you do this, then you add your chicken, fish, all this, then you add vegetable, then you get a very high protein meal.

Okay.

[@11:57](#) - **Chris**

Yeah, so, if let's say you have average.

[@12:00](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

One meal like that, right, the next meal technically you will be able to afford a bit of carbs, because usually this also means that like, if you have chicken then you have this one, usually your carbs count not very high, yeah, but most likely, most likely your meal will look something like that, then just zia yin ziyo ni, yeah, which, actually not bad, that looks quite appetizing, yep, yeah, so that is one option you can make, oh, yeah, then, uh, is that enough option or you want more?

Is there any others that usually you make?

[@12:40](#) - **Chris**

Hmm, based on my current meal preps, right, so, is there anything that you see I should be like, improve, or maybe should reduce, or, yeah, for my Monday, sorry, the day that I go office, right, I will have my meal preps, and then, I'm still

I'm coping on my Monday, because Monday is a trading day for us, so a bit busy, mean I start early at 7, so I tend to be, I mean maybe partly like stressed, so I tend to like want to chew something or eat something like after 10, even I have my coffee, for the usual day right, if I say I have my coffee, so I can last myself until like lunch, but on Monday I always have this crave.

[@13:25](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Let me share screen, then we can look at one of your Monday as an example, then maybe a bit easier.

SCREEN SHARING: Yi started screen sharing - [WATCH](#)

The one downside about me is I'm a very visual person sometimes.

[@13:40](#) - **Chris**

Is this a good Monday to stare at? Let me go through it. Yeah. Okay.

[@13:58](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yep, yep.

[@14:03](#) - **Chris**

But I know that because I have a heavy workload on Monday, so I have my overnight, perhaps after having that one, I still feel hungry, I'm going to find something to pop on top of my lunch as well.

What's Pisa Barang? It's just one of the banana. I'm also surprised that Pisa Barang don't have protein at all.

I thought...

[@14:30](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Don't have. Banana have it?

[@14:32](#) - **Chris**

Don't have. No.

[@14:34](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Not much. Not say don't have, just not much.

[@14:37](#) - **Chris**

Oh, okay.

[@14:45](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

This is a very lantua way to find out how much protein. I use my chat GPT to like estimate.

[@14:52](#) - **Chris**

But I mean, of course, it will be all based on the calculation from Evangeline as well. But it's just a gauge for me to like...

[@15:00](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Okay, let me use something a bit more validated, not much like 1.6g protein only, so actually you can consider taking away if you, if you want to save more calories, I would say the granola and the bisang goreng you can consider not having, but because it's 15g of granola, I'm not too, if you want it for the crunch, I'm not too I'm too, uh, stringent about it, I would say.

[@15:34](#) - **Chris**

Hmm. Yeah. Okay.

[@15:42](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Lunch is okay leh. Yeah, sorry?

[@15:45](#) - **Chris**

Is any other, like, snack that you would recommend, or?

[@15:49](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

I would put fruits.

[@15:52](#) - **Chris**

Yeah. I would put fruits.

[@15:56](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Fruits?

[@15:56](#) - **Chris**

Okay. Yeah.

[@15:57](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So, for example, you got your cassava. I would eat cassava chip with guava, or I would eat it with like, usually I would just find fruits that I like that is high fiber, that is not too high calorie, so for example, watermelon, guava, grapes, my girlfriend would choose lychee and longan but I don't like the shell, so I usually go and find those very easy to work with.

[@16:29](#) - **Chris**

But I think it's also like your name right, I ate, but the most I think the favorite one is still banana, that's why I always have my banana with my protein shakes.

[@16:39](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

You know why, you know why? Because banana hires it casually.

[@16:43](#) - **Chris**

There's a reason why runners use banana as part of their failing strategy. Oh. Yeah.

[@16:53](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, so, um, this one I think you don't have to do too much different. And that's the like if you will really want want to.

Make a change, right? Then you can just take away the pisang berang and the granola.

[@17:04](#) - **Chris**

If not, honestly, if this is exactly how you eat on a Monday, on a normal Monday, right?
Mmhmm.

[@17:11](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Oh, we need more protein, ho?

[@17:13](#) - **Chris**

Yeah.

[@17:16](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Sorry, bye, pisang. I think your chicken breast can afford to cook more.

[@17:25](#) - **Chris**

Mm-mm.

[@17:32](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

I'm bit kongpu la. I can eat up to, like, 200 grams of chicken breast in one sitting. That's usually what I would do for my lunch.

[@17:41](#) - **Chris**

I got the one from 7E, right? So I did, like, liang pien la, but a bit...

[@17:48](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then, like, Choose the...

[@17:51](#) - **Chris**

Perhaps then I will add on, like, 250, 180, but that... Let's say once you finish, right, it's, like, full, but again, a bit like a...

huh? Shesed!

[@18:00](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Not satisfied, right?

[@18:02](#) - **Chris**

A bit, yeah.

[@18:04](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

You usually got the, you know you're full, but then you feel like you just need something else.

[@18:09](#) - **Chris**

Correct. So that's where you put in your cassava chip, or your potato.

[@18:14](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Usually when that happens, it's because your stomach knows that there is food inside, but it's not getting energy.

[@18:20](#) - **Chris**

So that means, let's say I don't eat rice, let's say just chicken breast and veggies, then I can add my potato as well.

[@18:25](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

You can. Okay. Usually, I would say that the full but not satisfied feeling, usually I wouldn't get hit all the time.

Usually it's like when I don't have anything sweet to meet throughout the whole day. Then I'll feel like, okay, maybe I need something.

Yeah. Yeah. Yeah. Yeah. Some people, it's because no savoury taste, then they feel like something missing.

[@18:55](#) - **Chris**

Yeah.

[@18:56](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Based on the fact that you took cassava chip, I think maybe that's the case.

[@18:59](#) - **Chris**

about this. I don't. Also, it happened because we just came back from Bali, and then we got those snacks.

I think I know how to ask you. Do you remember that you share that there's two ladies? One that is on your Instagram that's saying that she lost like 5kg within her 6 months or 3 months?

[@19:18](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

7kg in 3 months, is it? Yvonne, is it?

[@19:20](#) - **Chris**

The mother? Yvonne, and then the other one, the more outspoken one, do you have their meal preps that can share?

Yvonne, is it? Ah, yes. Are we on the same goal? lose weight?

[@19:31](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Let me think, huh? Yvonne is currently trying to lose weight again. She left and then she came back for a month, because she has a month to claim from me.

[@19:41](#) - **Chris**

She referred me a client. Oh.

[@19:45](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yvonne's one, Yvonne's one actually not that big difference from yours, in the sense where she, she sometimes will eat up, so her eat up meal is the one that we usually try to like focus a bit more on.

Um... So her breakfast usually is like two eggs and then some sort of fruit, like dragon fruit, that kind of thing, then also protein shake, also protein powder, then lunch, so far, let me check what it's hers like.

[@20:15](#) - **Chris**

The protein shake that she took is the one that you introduced, right? Whey protein.

[@20:20](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Also whey protein, but when I introduced her, I introduced her something that was slightly higher in terms of protein.

Then we realized that taste-wise, it was not the best. Ah.

[@20:33](#) - **Chris**

Yeah.

[@20:34](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then I also burp because I don't have, okay la, usually chocolate say flavour, nan ni zi dao, wah, hanan heo.

[@20:40](#) - **Chris**

Yeah. Okay, I bought some of the protein bar from Bali as well.

[@20:45](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Ah.

[@20:45](#) - **Chris**

It's actually very, I don't like it, like, I mean, granola have the sweet taste, right? But this one totally is like...

[@20:52](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Must, must choose the right bar.

[@20:55](#) - **Chris**

Is it? Like, last, the last time I tried was the one that Mahasun bought. from US, so it tastes like a bit like nian-nian, so I didn't dare to buy again, then until like lately when I went to Bali right, so I'd buy a few ones like small pack, it's just the same eh, it's good.

[@21:17](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, I need to find the right one, sometimes like, I would say maybe 60-70% in the market is not say the best.

Yeah.

[@21:26](#) - **Chris**

Is there any protein bar that you bought from 7E before? how much?

[@21:32](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Warrior, okay. PHD, some people say nice.

[@21:35](#) - **Chris**

Warrior bar.

[@21:37](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Warrior bar and PHD can try. about?

[@21:39](#) - **Chris**

Warrior, O-R-E.

[@21:40](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Warrior, W-A-R-R-I-O-R.

[@21:44](#) - **Chris**

Oh, Warrior, okay. Yeah.

[@21:49](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Let me see. Yvonne just ate durian. She was so concerned about her durian.

[@21:56](#) - **Chris**

Yeah, I took on last week as well, last weekend.

[@22:00](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, you need to enjoy life while you are, like you need to enjoy once in a, like you either need to plant in some sort of joy as part of what you are eating on a routine, or you need to once in a while be able to find joy in the food that you are eating.

[@22:20](#) - **Chris**

If not then, it's very difficult to create that sustainability. You can see chicken breast to hard boiled egg, same ah.

Yeah. But her chicken breast is also like 100 grams, is it? grams, correct. Yeah, usually most of us, we are starting with 100 grams already.

Ah, okay.

[@22:43](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So you can see like a lot of fruits, yeah. She tends to wet fruits a bit more.

[@22:49](#) - **Chris**

Okay. Yeah. So we should buy more fruits. Can consider having fruits along with vegetables. Okay. Yeah.

[@23:00](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So this is like her, usually like the plus-minus standard, she'll get like kiwi la, then two hardboiled eggs.

[@23:05](#) - **Chris**

Hmm.

[@23:07](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah. Yeah. I think increasing the chicken breast will be good. Yeah, 150, 100, 150, you'll get about 30 grams protein.

You need to hit, you need to hit at 120, is it?

[@23:33](#) - **Chris**

Huh? How many grams did I say that you need to hit ah?

[@23:36](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Do you remember?

[@23:36](#) - **Chris**

120.

[@23:38](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Hmm, 120. So, breakfast, you should already get about 30, 30 to 35.

[@23:51](#) - **Chris**

Mm-hmm, correct.

[@23:53](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then lunch, you'll get, if you get up to 150, then you'll get about, ah, one... 60 grams in total.

60 to 70 grams in total. Then... How much?

[@24:06](#) - **Chris**

160? 130? 150 grams, right?

[@24:09](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

150 grams, you should get about 30 grams of protein.

[@24:12](#) - **Chris**

30, okay. Yeah.

[@24:14](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So now you're at about 65.

[@24:17](#) - **Chris**

Okay, yes.

[@24:18](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

That you need to hit about 60 to go. Means during snack time, maybe it would be good to just get like a lot of your coffee, you get another protein.

[@24:30](#) - **Chris**

protein shake in. My protein shake, like I said, take protein shake, then it will be my calories ready. I mean, it will affect my calories, right?

[@24:42](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Uh... But your point is you want to hit the protein before you hit dinner, right?

[@24:47](#) - **Chris**

Hmm, correct. So this protein...

[@24:50](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

If you take away your pisang berang, then you've got calorie D, so you can shift the calorie over to your snack time off.

Oh... So let me move...

[@25:00](#) - **Chris**

And protein shake, right? It should not be mixed with milk, right? It's only with water.

[@25:05](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

You can.

[@25:06](#) - **Chris**

So I can do my like 50 to 80 gram of milk plus my 20 gram of protein.

[@25:13](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

You will up the total calorie a bit, but if that makes you a bit happy, then it's okay. Like, I think huge chocolate protein should be about 120, right?

[@25:26](#) - **Chris**

Hmm, 20 gram. Yeah, I still got some, so let me clear, finish then, yeah, watching. So, counting the 20 gram is about 133 calorie, but 20 gram is 14.

[@25:39](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Okay. Yeah, so if you add like 50 to 80 grams of milk to it, then you're probably looking at about 200 plus minus.

plus.

[@25:48](#) - **Chris**

Yeah. Yeah.

[@25:50](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So 200 plus minus.

[@25:52](#) - **Chris**

It just repeat again, like either you eat chicken with I mean, others protein, huh?

[@25:59](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Uh... For Monday specifically, I think white rice should still be quite safe because you're not getting a lot of it, but if you want more volume that day, maybe like you want to eat more food, right, like food volume itself, then potato or sweet potato or pangki might be a good choice.

[@26:18](#) - **Chris**

Okay. Hmm. Ten. Yeah.

[@26:28](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then that should help you solve quite a bit of problem already.

[@26:32](#) - **Chris**

Sorry, can we go back again, just not when you say breakfast, right?

[@26:36](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Huh?

[@26:36](#) - **Chris**

The combination of the degree of protein is the combination of my coffee milk or raw oats, is it?

[@26:42](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Your coffee milk plus your protein powder plus your farm fresh milk. So, the raw oats usually, usually not a lot of protein inside oats, from what I remember.

[@26:55](#) - **Chris**

Mmm. So that means breakfast, I still have this protein plus my... Coffee thing, and then my snack time also the same, before dinner.

[@27:04](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Correct. Except your snack time you don't have overnight oats.

[@27:09](#) - **Chris**

Okay. Snack time you only include the extra one scoop of protein powder. Okay, then.

[@27:14](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, but the breakfast you take away your pisang berang, so that you can make space for your snack time protein.

[@27:21](#) - **Chris**

Okay, then.

[@27:23](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then like that, you should heat. Okay. minus, you should heat close to 100, 110 la. Maximum 120. Because your lunch, also increase protein already ma.

[@27:34](#) - **Chris**

Mm-mm.

[@27:35](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, so you should get 30, 30, 60, 60, 75, 85, 85, plus another 30, about 110 la, correct?

[@27:45](#) - **Chris**

Yeah, okay. Yeah.

[@27:47](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

I mean, let me try to work out this one, then it should be fine. Okay. Yeah. So this one is probably like a good staple.

This one is probably a good staple.

[@27:58](#) - **Chris**

Yeah. Yeah.

[@28:01](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Only if you feel like this is sustainable, if not then we need to look at other options.

[@28:07](#) - **Chris**

So I placed option one here already, chicken breast, salmon, air fry or steam.

[@28:13](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Just take note, salmon fish is higher in terms of calorie because of the omega 3. So just take note of that.

Sometimes I will be a bit more mindful when I eat more than 100 grams.

[@28:27](#) - **Chris**

Of course the calorie will load up quite fast.

[@28:30](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

If you are a bit scared, one of those things you can do is half salmon, half chicken.

[@28:35](#) - **Chris**

Okay. Yeah.

[@28:37](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then, because I left pumpkin rice, then I'm going to put, bracket I can consider, sweet potato and potato. Yeah.

Then your vegetable, I just leave it as water boil or salad.

[@28:56](#) - **Chris**

Then, the second option, I just left it to be a bit more flavourful.

[@28:59](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

white a out of. fficialer.com just It's left here as mala, paya, tofu, chicken, and vegetables.

[@29:03](#) - **Chris**

Mm, the one I prepped before, so, I mean, yeah, I can just check back. Mm, yeah.

[@29:09](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Do you feel like two is enough, or do you need more?

[@29:12](#) - **Chris**

Um, I think it's enough, but, like my 8 out, right, so is there anything that I can keep my high protein, but it's still lesser than 500.

So, right now, I have few choices on my 8 out. Like, the most one, I think, is the Tori, and then the 7E, Instant Pack.

[@29:30](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Is this the Tori that you're talking about?

[@29:32](#) - **Chris**

Mm, but I think it's slightly higher with the rice, or, yeah. Mm-hmm.

[@29:38](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

This one, if you have rice, should still be plus minus 500.

[@29:46](#) - **Chris**

Yes, correct. So, instead of, like, picking up the pork, so, I change all to chicken. Mm, but we would like to be very sad if you eat at home chicken, then eat at also chicken.

Yeah, because I think I cooked the one on the 26th June, so I have my distortin rice set, less rice, two chicken, one chicken bowl, and one chicken with green pepper, so it end up about 400 calories, and then my protein is about 33 as well.

[@30:18](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Actually it's okay leh.

[@30:20](#) - **Chris**

Mmm, okay. I see lah, but okay lah. I mean, don't try lah, I'm gonna say I got time that I will cook, but sometimes just don't want the fast one.

I stared at this box, I think got \$10?

[@30:32](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

\$9?

[@30:33](#) - **Chris**

9 ba, I guess, I can't remember.

[@30:35](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

9 ah. Yeah, I think about 9, once take \$2, plus plus plus \$8 .

[@30:42](#) - **Chris**

Yeah.

[@30:44](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

I think it's how you know we all eat in this kind of place too many times.

[@30:49](#) - **Chris**

Yeah.

[@30:50](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Um, do you like Subway? Are you a fan of Subway? Subway, yes.

[@30:56](#) - **Chris**

You can. amabway, yes, you can guide me on the prices of my brands.

[@31:03](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

The bread doesn't matter as much. Okay, so the interesting thing is bread is apparently healthier than bread. Bread is apparently lower in calorie compared to bread.

[@31:17](#) - **Chris**

Okay, okay.

[@31:18](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, so don't need to spend extra cash, you can actually just get the bread itself.

[@31:23](#) - **Chris**

Okay. If that day you don't want carbs because maybe you had a heavier meal or whatever, then you can just go straight for the salad.

Okay.

[@31:31](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

I have a tendency to not choose cheese when I'm getting my Subway. My justification is because I feel that the cheese don't really add flavour.

[@31:42](#) - **Chris**

Okay. Yeah.

[@31:44](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then usually I take all the vegetables. sauce. If you want sauce, usually the safer option is sweet onion and Thai chilli, I think.

And then barbecue.

[@31:59](#) - **Chris**

Okay.

[@32:01](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, those are usually what I would do. Then, if you need extra meat, just add double meat, then too bad Singapore don't have one dress up.

[@32:12](#) - **Chris**

Oh, the one with chicken wrapping. So annoying.

[@32:20](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then, if you want convenience, then you're looking at this.

[@32:25](#) - **Chris**

Oh, yeah. I had it for my lunch just now as well.

[@32:30](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

I had this one for lunch just now.

[@32:35](#) - **Chris**

And this? You get it from? Yeah, 7-Eleven.

[@32:38](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Oh, 7-Eleven.

[@32:39](#) - **Chris**

Yeah.

[@32:41](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Got like eight meatballs, and then mushroom sauce.

[@32:46](#) - **Chris**

I've seen this brand at Somerset or Tiong Baru area.

[@32:51](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

It's quite recent. Like, sometimes they will have, sometimes they will have, but currently this season they have.

[@32:57](#) - **Chris**

Oh, okay. think.

[@32:58](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah. down Apa I don't feel feel So, I tend to choose this one when I see it, because it's just beef 4, but the source of 30% on your stay, once you hit your minimum purchase, so you say I want to like supple some of the 70s, oh, still have ah, the 20%?

[@33:17](#) - **Chris**

I don't know, but you say when I passed what I saw like, you need to buy like 20% dollar, then you hit like 20%, yeah.

Sometimes you need to, you need to do the \$20 to 20% thing, then I will go and supple a lot of meals, or like go and eat all the chicken breasts.

Yeah, because the rugby, I think they're slightly higher than fair price. They sell it like 690, but fair price is only at 490, so I mean, no point you go and buy there lah.

Yeah. Yeah.

[@33:43](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

I only buy rokami there if I have no time and no choice, and desperately looking for protein.

[@33:51](#) - **Chris**

Yeah. And lately I think they also sell a lot of protein grains as well, like those protein brands. I don't know.

Yeah.

[@34:01](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So this is another option, like your 7-Eleven chicken breast, so if you want to do a quick meal, right, sometimes what I would do is, if I want to save money, then I would do 7-Eleven honey mustard roasted chicken sandwich.

[@34:25](#) - **Chris**

Yeah, it's fine for you. But I think the sandwich also easily hit 300-400 cals. Correct.

[@34:43](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

But it's a quick full meal. So, yeah, usually got one or two that you can rely on. Not you, not you.

No. This one, eh? Not this. This one. Hmm. Yeah, 23g protein, 363 calories. Okay. and if you want to boost your protein that day, then you can just add with one chicken breast.

Then you hit 43g protein already.

[@35:18](#) - **Chris**

Hmm, okay.

[@35:20](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So that's one way, then you're still at 450 calories, so that's actually not too bad.

[@35:25](#) - **Chris**

Yeah, correct. Yeah, then you got some vegetable, you got some bread.

[@35:29](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So, uh, quite okay. Price-wise also not the worst.

[@35:34](#) - **Chris**

Yeah.

[@35:35](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then an alternative is you buy this one, then you buy the, they got this 450 combo meal. So you buy this, then you buy like the soybean milk, unsweetened one, then it's 450.

Yeah. Then you get about, I think, 12g protein or something like that. Yeah. Okay.

[@35:55](#) - **Chris**

So that's an option.

[@35:56](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

10.

[@35:58](#) - **Chris**

10. 10.

[@35:58](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

10? Another quick meal that sometimes I would do, if I got no time, is I would go Mr.

[@36:04](#) - **Chris**

Bean.

[@36:07](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

I will do, where is it? Eggwich. I'll do honey-baked chicken, ham, eggwich. So this gets me about 14g protein.

[@36:18](#) - **Chris**

Then I'll do the classic soy milk, no sugar. Okay. I tried the bun before, but I don't like it.

[@36:27](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Sorry? I tried the bun before. Oh, yeah.

[@36:31](#) - **Chris**

You can get this one also, 17g protein. Mm-mm. Yeah, so at that I counted, think, like 30-ish gram protein in total for like 400 calories.

Okay, got it.

[@36:45](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

so that's another option.

[@36:47](#) - **Chris**

Yeah.

[@36:50](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then... Those are a few go-to's a lot that you can try working around first.

[@36:55](#) - **Chris**

is. I think. it's. Yeah, kind of good, like, let's say after my gym, right, so I'm in a hurry, so I can just grab and then, yeah, go back home with it.

[@37:07](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah. 7E is like my go-to option nowadays.

[@37:14](#) - **Chris**

Yeah. It's actually cause like, lunch hour queue very long, right, then I don't want to wait, then I'll just go downstairs, go and buy, then just come up ready, then continue working.

Oh. Yeah.

[@37:26](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Then, yeah, even though then when I'm at office, then sometimes I'll just take fish soup, the spinach type, yeah, then usually I'll just add like, either I'll add chicken or I'll fish, then I'll just not take rice, cause the total protein is quite high, then if I add rice, the calorie burst quite fast.

Yeah. Got it.

[@37:49](#) - **Chris**

Yeah, so that's also an option, lor. 10E. Hmm.

[@37:53](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Okay. Do these help? Yes.

[@37:57](#) - **Chris**

Okay. mean, give them some idea, like... More reference as well. Hmm, okay.

[@38:03](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

You feel like you have enough to work with for now, or you still feel like you need more?
Or you feel like we should start with this first?

Yeah, I start with this one first, then we will see how then, yeah. I will just send my feedback and then, yeah.

[@38:15](#) - **Chris**

Get your advice as well. Okay, Kari.

[@38:18](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Thank you.

[@38:19](#) - **Chris**

We start from here first. Do you have your wedding luncheon, dinner tomorrow? This week, right?

[@38:25](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Ah, okay.

[@38:26](#) - **Chris**

Sunday, Sunday.

[@38:27](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Are you coming?

[@38:28](#) - **Chris**

Uh, maybe I can't, sorry. It's okay, all good.

[@38:33](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah. Yeah. It's okay.

[@38:36](#) - **Chris**

Yeah, we are...

[@38:38](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

It's a very casual thing, lah. We just book a space, then we just say, hey, we got married, you want to come, then, like, just chill together, or celebrate, that kind, yeah.

[@38:47](#) - **Chris**

Is all your family here, or do you have to fly in?

[@38:51](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

No, my family is here. Ah, that's good.

[@38:54](#) - **Chris**

Yeah, yeah, yeah.

[@38:54](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

So nobody needed to fly in, thankfully.

[@38:57](#) - **Chris**

Do you think I like wedding leave?

[@39:03](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

We actually got married on Monday already, then she would say go back already.

[@39:11](#) - **Chris**

Yeah, so you posted on that group as well.

[@39:15](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Yeah, yeah. So, I was like, morning I was just doing the feedback, finished and then she would go to R.O.M.

Then they had to continue working after that.

[@39:26](#) - **Chris**

Yeah. Okay, we are quite unconventional and she works in the company so it helps.

Yeah. Okay, thanks James. No problem.

I'm you end of the month, right? Yeah, the month end, yes.

[@39:39](#) - **Sports Nutritionist James (yeoyiquan@gmail.com)**

Okay, let me update from there. See you. Bye bye.
